---

Rus,

The label is acceptable, including the use to control commensal species beyond 50 feet with the methods described because the product is a "Restricted Use Pesticide".

The 1998 Rodenticide Cluster RED required "field uses" of actives subject to this RED to be "restricted".

Thank You,

Good Morning Rose,

I believe this is ok, but I am not the most appropriate to ask this. Does anyone else see an issue with commensal rodents also being included on this label?

---

Rusty,

Are you sure that the noncrop use for rat and mice control on page 7 of 7 is OK?

We are OK with it (actually it is a rare label), and are definitely not asking for change.

Rose
